

# Food Waste Recycling Program

JN Grease Service, Inc. specializes in the recycling of most forms of food waste. We have designed our food waste recycling program to be hassle-free for our customers. Not only does recycling food waste reduce costs by diverting from our local landfills, it also provides an eco-friendly solution.

## Inedible/Waste Food

Inedible/waste food products includes food that is spoiled, expired, has faulty packaging, or has been compromised in some form. Some of these foods include; fruits, vegetables, bread and grain product, flour based products, dressing, condiments, and pre-packaged food. All of these food products are processed and converted to usable by-products.

## Recalled Food Products

We utilize special equipment to destroy recalled food products. This ensures that any food product labeled as "Not For Human Consumption" is destroyed accordingly. Through mechanical separation, recalled food products are separated from their original packaging and disposed of.

A Certificate of Destruction noting all applicable information Including pictures will be provided.

## Beverage / Liquid Waste Products

JN Grease Service offers pumping service for beverage and other liquid wastes. Pumping service is provided for bulk waste materials while pre-packed beverages and liquid waste will be picked up decanted at our facility.

## Storage Solutions

JN Grease Service offers multiple solutions for storing food waste. For large volume manufacturers, we offer roll-off containers. For smaller volume we offer totes or drums, depending on your needs.
